

Video switching and audio amplification components are securely mounted and concealed out of sight - away from tampering hands.

Extron MLC 104 IP Plus MediaLink Controller

The Extron PoleVault™ System

Easy-to-use A/V in Every Classroom

All from one Manufacturer

The Extron PoleVault System is a unique A/V solution that mounts all the switching and audio amplification components securely above the projector. PoleVault Systems are all-inclusive complete A/V systems that are easy to install, use, and support, making them ideal for single-projector K-12 classrooms.

Each PoleVault System includes all the projector control, mounting hardware, switching, speakers, wall plates, and cabling needed for a complete A/V system. Everything made, supplied, and supported from one manufacturer: Extron, where your satisfaction is guaranteed. All that remains is to add the video projector, projection screen, and sources.

The PoleVault System offers:

- Complete, centralized A/V switching and control system with stereo amplifier using CAT 5 cable from wall plates to projector
- Network ready with integrated IP Link® allows in-room, as well as campus-wide control, asset management and support over your network
- Easy and economical installation, configuration, and maintenance; no programming required
- Unique pole-mounted enclosure provides tamper-resistant theft deterrence and takes up no floor space
- **Ask about the Extron “Grant Program”**
